

# The State of Happiness

Find Your New Happy

Why do we move?

# The Idea:

- ❑ An application for quick state information including population, median household income, breweries, and the state's overall mental health.
- ❑ While researching a possible future home a Google search changed my path.

AS A prospective citizen

I WANT a thriving city

SO THAT I can be  
successful after a new move.

---

# The Creation:

- ❑ Technologies Used: <https://datausa.io/about/api/>, <https://dictionaryapi.com/>, <https://api.openbrewerydb.org>, VS Code, GitHub, Slack, JavaScript, CSS, Adobe XD, jQuery, Pixabay, and Bootstrap.
- ❑ Front End Team: Lauren Minton & Stephen Reynolds
  - Map design, layout, and interaction
  - Client side
- ❑ Back End Team: Rob Quinn & Joe Bailey
  - API calls and data manipulation
  - Function creation and implementation
- ❑ Obstacles: branching/merging, schedules, state definitions, map size, and MVP vs. WP
- ❑ Victories: map, database knowledge, problem solving, and communication

Find Your New ([hyperlink to map](#))

# Future Drilldowns:

- ❑ Most populated cities in each state.
- ❑ Popular career fields in each city.
- ❑ School ratings in top 5 cities.
- ❑ State unemployment rate.
